DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 14-18 and 20, drawn to a motor drive control system, classified in class 318, subclass 438.
 - II. Claims 6-13 and 31-32, drawn to a gate driver for a power switch, classified in class 363, subclass 34.
 - III. Claims 19, 29 and 30, drawn to noise extraction or noise sensing for a motor drive control, classified in class 318, subclass 460.
 - IV. Claims 21-28, drawn to noise reduction for reducing in a motor drive system, classified in class 318, subclass 629.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions motor drive system and the gate driver, the noise extraction and the noise reduction are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a motor drive system of group I (the combination) does not require a specific gate drive of group II (subcombination) or a noise extraction of group III (subcombination) or a noise reduction of group IV (subcombination). The subcombination has separate utility such as a gate driver can be used to control a general purpose inverter for converting a 12 volts DC to a 120 volts AC for a household use in case of power interruption; a noise extraction circuit can be used with a fiber optic

communication system; a noise reduction can be used with a pulse code modulation in digital music industries.

3. The drawings filed on 7/24/2003 are informal. A new set of formal drawings is required before the allowance.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bentsu Ro whose telephone number is 571 272-2072. The examiner can normally be reached on WS08605.
